

## Angular JS

### **Description:**

Angular is a platform and framework for building single-page client applications using HTML and TypeScript. Angular is written in TypeScript. It implements core and optional functionality as a set of TypeScript libraries that you import into your apps. AngularJS is a client side JavaScript MVC framework to develop a dynamic web application. AngularJS was originally started as a project in Google but now, it is open source framework.

### **Start Date:**

### **Doubt Clear Time:**

### **Course Time:**

### **Features:**

# Lifetime Dashboard

# Free Course

# Certificate

# Assignment

# Quiz

### **What we learn:**

# Practical implementation of Angular JS in real world

# End to End concepts understanding

### **Requirements:**

# Computer with Internet connectivity

# Basic Programming understanding

### **Instructor:**

#### **Name:**

Keshav Singh

#### **Description:**

Awesome teacher
